

Marblo[®] Designer Bathware Care & Maintenance

Marblo[®] solid surfaces are created to be non-porous, clever Marblo[®] chemistry will prohibit liquids and chemicals being absorbed. The result is an easy care and hygienic surface. Although Marblo[®] is tough and durable, it is not indestructible. Regular maintenance will be required to keep the product's surfaces at their best.

As with most things in life, prevention is better than cure, so please read the recommendations below to ensure that you enjoy years of service from your investment in Marblo[®].

1. Day-to-Day

After use, remove any residue from soap, shaving or brackish water by rinsing and a quick wipe over with a damp cloth or sponge.

2. Regular Bathroom Cleaning

When conducting your regular bathroom cleaning, simply wipe over the surface of your Marblo[®] bathware product with a mix of 5% Lemon Jif^{**} Cream Cleanser to 95% warm soapy water. An ammonia-based cleaner such as Spray-and-Wipe[™] can also be used. Rinse and wipe over using a clean damp sponge.

To remove build-up of lime, hard water scale or soap residue, use a standard household lime remover, rinse well.

3. Spills

In the event of a spill of harsh household chemicals, dyes or the like, in most cases staining can be prevented with minimal effort. Immediately clean with a damp sponge, using appropriate safety measures and wipe over with soapy water. Clean the entire surface using a mix of 5% Lemon Jif^{**} to 95% warm soapy water applied using a damp sponge. If the spill has not been totally removed, clean the entire surface with 10% diluted Lemon Jif^{**} Cream Cleanser and a wet sponge, in a circular motion.

To maintain uniformity, do not apply too much pressure nor rub in the same area for a prolonged time. Rinse well and wipe clean. This will restore a matte / sheen lustre to the surface of your product.

4. Stubborn Stains, Light scuffs & Cigarette Burns

Apply Lemon Jif^{**} to the entire surface, using a damp grey Scotch-Brite^{***} pad rub in a wide circular motion. Be sure not to apply too much pressure nor rub in the same area for a prolonged time.

Before rinsing, clean the entire surface using a wet sponge in a wide circular motion. Clean well using a damp sponge.

A matte / sheen lustre will result. For gloss finishes, additional procedures will be required.

5. Prevention

Do not use abrasive cleaners, steel-wool or objects with sharp edges on the surface of Marblo[®] bathware product. Excessive heat, naked flames, ultraviolet radiation or harsh chemicals may also cause damage to your Marblo[®] surface. In most cases, Marblo[®] will withstand even this abuse by following the rejuvenation process outlined in item Stubborn Stains, Light Scuffs and Cigarette Burns.

In the unlikely event of a problem with your Marblo[®] Product or to learn more about caring for your Product, please contact your local Marblo[®] office or visit www.marblobathware.com.au
